

COPPER LINE™

Cage Mills

What Happens
in the Still Starts
in the Mill™

Cage Mills Designed for the Distilled Spirits Industry

Designed for flavor, the Stedman Copper Line Cage Mills are a artful blend of simplicity and refinement. The Copper Line has no screens to restrict material flow, eliminating grain scorching and the introduction of unwanted flavors.

Distilled Spirits

No other manufacturer has put all of your requirements into a custom machine built exclusively for you. Stedman has a long history in the spirits industry, and we understand that making the perfect mash is not only a science but an art. It takes the keen eye of a Master Distiller to know when the grains are milled to perfection because we know "What Happens in the Still Starts in the Mill™."

Is the Copper Line™ Right for You?

Worried about grain scorching and burning?
Tired of maintaining your hammer mill?
Want to reduce batch milling time?
Dislike the high costs of roller mills?

Production Capacity				
Model	 corn	 wheat	 rye	 barley
CL140	130-155 Bushels per hour	135-165 Bushels per hour	125-145 Bushels per hour	100-120 Bushels per hour
